

# The Theme was “Own Choice” Orchid Growing in the Future

We built two ROBOTS out of cardboard, arms were flexible pipe.

The one on the left, called FERTI—LIZER, has one arm in the fertilizer bucket, the other arm has a nozzle attached and is watering the orchids. (Fishing line is used as the water jets).

The one on the right is called RHE---POTTER, one hand is holding a pair of cutters and the other is holding the plant.
